SAARTHI AI

Your Guide to Government Benefits

Plain-language need → verified scheme eligiblity → last-mile assistance in

Team: **SAARATHI**

Welfare benefits exist. Access doesn't.

- **700+ schemes, scattered portals,** complex rules
- **Language + digital literacy** barriers block citizens
- **Billions in benefits remain** unclaimed; middlemen thrive

A 38-year-old farmer in Maharashtra earning ₹85,000 still can't find housing + +agriculture support fast.

SAARTHI turns confusion into clear action.

- **Conversational intake** (text + voice)
- **Profile extraction** + intent understanding
- **Ranked schemes** + eligibility dashboard + apply guidance
- **"Request CSC Assistance"** for last-mile help

Before	Apyer	After
hours/days	→	< 30 seconds
unclear	→	explainable matches
no help	→	routed operator support

Before: hours/days → < 30 seconds

After: unclear → explainable matches

Citizen experience (zero friction).

1. **Landing** → Start Discovering
2. **Chat**
3. **AI processing** (FastAPI + rule-based NLP + MiniLM)
4. **Eligibility dashboard** (profile sidebar + scheme cards)
5. **Apply Now** or Request CSC Assistance

"I am a 38-year-old farmer from Maharashtra earning ₹85,000 and looking for housing support."

How Rural People Use IVR

With **Ease-of-Access IVR**, even the most vulnerable can access welfare benefits using just an ordinary phone.

1. **Dial** a toll-free number like `13xx-xxxxxxx`
2. **State needs** in local language
   Speak freely and **describe about yourself**
3. **Hear eligible schemes**
   Get personalized scheme recommendations after eligibility verification
4. **Get operator assistance**
   Optional last-mile assistance with CSC operator callbacks

No smart device or digital literacy required.
Ordinary citizens can access help from anywhere.

Operator Journey

(Dashboard & Fulfillment)

1. Login
2. View Dashboard
3. View Queue
4. Manage Queue
5. Assist People

Flow: Login → Dashboard

Login → Dashboard → Queue → Manage → Assist

Last-mile routing (the differentiator).

When citizens request help, **SAARTHI** assigns the nearest verified **CSC Operator** for quick offline assistance—seamlessly.

Citizen Requests Help

Verified Operator

Trust Layer
Background Verified, Authorized CSC

Smart Assignment Logic

Real-time Location, SQLite Registry

Smart Assignment Logic

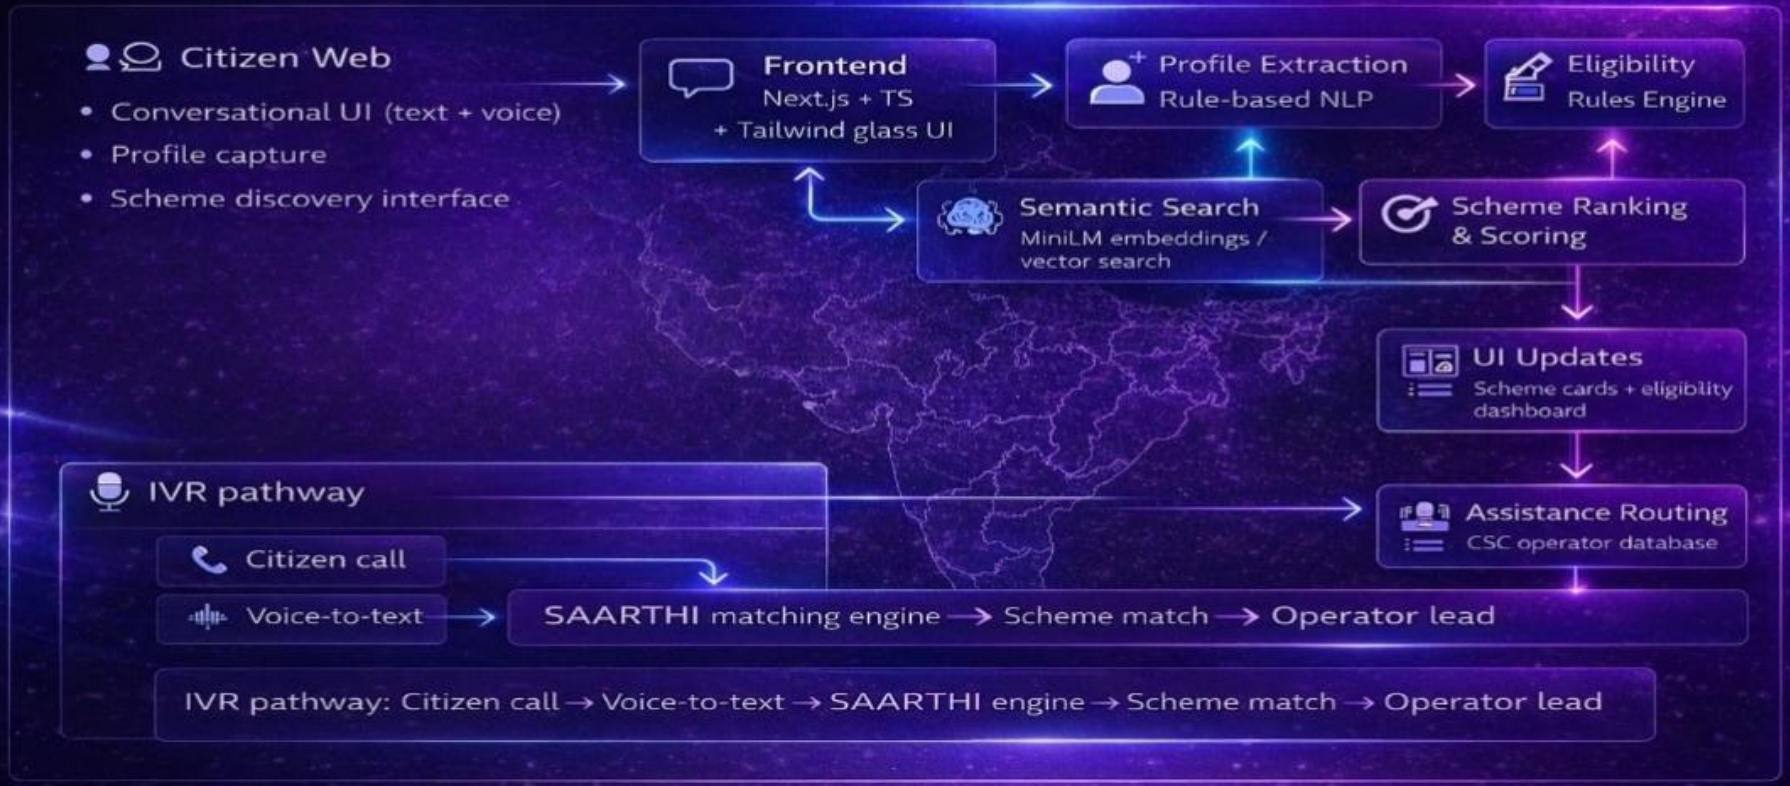
SAARTHI Architecture (Tech + AI)



Why SAARTHI wins.

Plain Language + Voice
(accessibility)

"मुझे वेस्नर वेतं ताहिंए"
→ to voice calls,
we support how citizens naturally communicate

Hybrid Intelligence: rules + embeddings
(precision + recall)

Rules + embeddings mean high recall with fewer false leads vs keyword search

Last-mile routing to operators
(real adoption)

Routing engine ensures physical delivery, not just chatbot interactions.

Friendly chat to clear any doubts

Have a friendly conversation with an operator to resolve questions and misunderstandings.

Impact & Validation

(Demo Stage)

Citizen Outcomes (Expected)

- Faster scheme discovery
- Reduced dependence on middlemen
- Clear eligibility guidance

Government Outcomes (Expected)

- Improved scheme reach
- Better last-mile delivery
- Data-driven decision making

Performance (Demo Observations)

- Real-time response (<30 sec in demo)
- Functional operator dashboard
- Working citizen-to-operator workflow

North Star Vision

Enable millions of citizens to access welfare benefits they are eligible for

Roadmap (next 90 days):

- DigiLocker readiness sim
- WhatsApp notifications
- Multilingual voice | IVR pilot
- Stronger operator verification

Thank You.
